A Story of Fifty Years

"Montreal, February 16 Fifty years ago today incorporation of the Canadian Pacific railway took place. George Stephen, afterwards Lord Mount Stephen, was the first president. The company deposited with the Dominion Government, at Ottawa, a cheque for \$1,000,000 as a guarantee that it would fulfill its contract to complete the railway to the Pacific Coast. This pledge was completed in five years instead of the ten the contract called for."

"This brief but significant news despatch appeared in the daily newspapers of Canada on February 16 last. It recalls an historic incident, a milestone in the history not only of Canada but of the world. It only carries the mind back, but because of all that backward glance discloses, it inevitably forces the mind forward to contemplate what the next fifty years may unfold. It impresses one with the tremendous developments and possibilities of a span of only fifty years."

Fifty years ago the project of a transcontinental railway across Canada was viewed with scepticism by thousands in Canada and was regarded as the maddest kind of a venture in Great Britain. Men prominent in public affairs declared it would never earn its axle grease. The country it was to traverse was described as a wilderness, partly desert, incapable of successful cultivation and settlement by white men, followed by miles of snow capped mountain peaks and ranges.

That success rather than failure followed the great undertaking can be credited to a few far-seeing, far-seeing men who were versatile giants in energy, resource, and grim, unshakable determination. In some respects they were ruthless; their methods were not always above suspicion, but they had a vision and a driving force to achieve their goal, to overcome all and all obstacles. Individually they staked their all on the success of the enterprise, obliterated the word "failure" from their lexicon, and won. Canada, the world, knows the result.

The railway made a new nation. It opened up an empire. It altered the trade routes of the world. It brought the Orient to the Occident, and the Occident to the Orient. The enterprise initiated fifty years ago by a new-born Dominion of a few millions of people, has amazed the world. It has become the greatest transportation system in the world, with its fixed bands of steel not only crossing and criss-crossing Canada, and extending well into the United States, but with its vessels navigating the seven seas, calling at the ports of all nations, and circumnavigating the globe.

The Canadian Pacific Railway has helped to make Canada what it is. It has made and unmade Canadian Governments. The history of the Canadian Pacific is in part the history of modern Canada. The success of the railway has been bound up in the development, the prosperity, the success of this Dominion. The management of the railway has always recognized that fact, and it has been pro-Canadian at all times and in all its policies. It has made mistakes, of which it has been self, even dictatorial at times, but it has always been magnificent.

The Canadian Pacific has been created and developed under the presidency of four men, Sir George Stephen (later Lord Mount Stephen), Sir William Van Horne, Sir Thomas (later Lord) Shaughnessy, and Mr. Edward W. Beatty. The history of the railway may likewise be divided into four periods, or possibly three as the first two merge into one. First the period of organization of the United Empire Loyalists, second the period of operation under Stephen and Van Horne, second the period of well organized, highly efficient operation under Shaughnessy, with well defined policies of branch line construction as feeders, opening new territory, and the establishment of mercantile trade and service; third, and coupled with a vigorous continuation of the Shaughnessy policies, what may be termed, in the absence of a better word, the diplomatic period under Beatty wherein up-to-date railroading has been strengthened by securing goodwill, the admiration, the co-operation of the public generally, and the elimination of those feelings of suspicion and antagonism which undoubtedly marked the relations of the people and the railway in the earlier days.

And in the story of the railway there is not a lesson and an inspiration for the people of Canada? The railway had its periods of difficulty and depression, just as individuals and nations experience them, but it surmounted them. The makers of the Canadian Pacific did not shorten their vision to a year or two, or five or ten years; they looked into the future and planned and built with courage and confidence. They have had their reward. So, too, should the Canadian people maintain the forward look, act with courage and decision, remain confident. Canada has done great things in the past; it can do greater things in the years to come.

A New Floor Covering

"Bafiumum," derived from a plant resembling an anemone, may some day take its place on floors as a rival to linoleum, if experiments now being conducted by the United States Department of Agriculture are commercially successful.

When Food Stays Fresh Longer

About two hours after eating many people suffer from sour stomachs. They call it indigestion. It means that the stomach nerves have been over-stimulated. For a few days the acid. The way to correct it is with an alkali, which neutralizes many times its volume in acid.

The right way is Phillips' Milk of Magnesia—just a tasteless liquid; pleasant, efficient and harmless. But it kills excess acids. It has

Invents "Moon" Rocket

Frank Falken, an electrician from the town of Upland, says he has built a rocket with electro-magnetic propulsion which "ought to be able to reach the moon in three weeks." He has offered it to the Junkers airplane people.

It may be mixing metaphors, but the man who puts his shoulder to the wheel seldom has to put his nose to the grindstone.

It takes just 365 days for a new year to change from a sort of Cupid to an old man with a scythe, over his shoulder.

A white otter was recently trapped in New Brunswick.

A Scientific Mystery

Source Of Cosmic Rays Has Not Been Discovered

Discovery of cosmic rays in penitence—the same rays that penetrate about 700 feet into earth—is described in advice received at New York from Vienna.

The communication is from Prof. E. Spatz, president of the Chemical and Physical Society, and is meant to clear a misunderstanding about the report made recently to the society of Prof. Victor F. Hess, of the University of Graz.

Vienna despatches had it that Professor Hess announced the discovery of cosmic rays and that his talk created a sensation among scientists. But Prof. Spatz points out that Dr. Hess did not claim to have discovered cosmic rays, which were found 18 years ago, but that he had evidence that a small percentage of these rays come from the sun.

Their origin has been one of the greatest scientific mysteries. The fact that most electroscope used to detect them showed no change in level when they were held by some scientists to eliminate the sun as a source.

BREAKS UP GAS IN THE STOMACH

Don't suffer from dangerous gas pressing against your heart, from sourness, acidity, bloating, or other ailments. When you need quick stomach relief, take a dose of the famous Marmite powder or tablet. It breaks up gas, kills sweet and sour, and indigestion perfect. At all drug stores.

Honored By Italy

F. C. Elford Appointed Member Of Executive For Fifth World's Poultry Congress

F. C. Elford, Dominion Poultry Husbandman and Past President of the World's Poultry Science Association, under whose auspices the Fifth World's Poultry Congress will be held, has been signally honored by the government of Italy, who appointed him a member of the executive for the Fifth World's Poultry Congress which meets in Rome in 1933. Mr. Elford has also been asked to take charge of organization of the Canadian delegation to Rome. From present indications the next Congress will fully equal the success of last year at London, England.

One of the most effective vermifuges on the market is Miller's Worm Powders. They will not only clear the system of worms, but will provide a very serviceable medicine for children in regulating the intestinal system and maintaining it in a healthy condition. There is nothing in their composition that will injure the most delicate stomach when directions are followed, and they can be given to children in the full assurance that they will utterly destroy all worms.

American Films In Britain

Eighty-Five Per Cent. Of Motion Picture Films Shown in England Are Of American Origin

Eighty-five per cent. of the motion picture films shown in England are of American origin, and only 15 per cent. are of British origin, according to a report of the Motion Picture Distributors of Canada, testified before the investigation into affairs of the motion picture industry in Canada at Toronto. Investigation is cleared around affairs of the Famous Players Canadian Corporation and its subsidiary companies.

Only about 30 Canadian pictures had been made since 1918. Col. Cooper stated.

Protect the child from the ravages of worms by using Mother Gravel's Worm Expeller. It is a standard remedy, and years of use have enhanced its reputation.

Looking For Samples

A first record of a complimentary ticket to the motor show. Stopping in front of a magnificent limousine, he casually ignored the price. It was \$10,000. Sandy shuddered and moved on. The next car he came to was \$6,000; he passed on and saw cars priced at \$2,000, \$1,000, \$750 and \$500. At the end of the row were a few of the "baby" type. Sandy looked at the salesman hopefully. "Are these your free samples?" he asked.

It may be mixing metaphors, but the man who puts his shoulder to the wheel seldom has to put his nose to the grindstone.

A white otter was recently trapped in New Brunswick.

Links With The Past

Scientists Constantly Learning New Facts About Climate and Vegetation

Buried forests, the vestiges of past ages, come to light now and then to reveal new facts to the scientists about climate and vegetation. Trees which are known to exist today only in tropical climates have been found beneath the surface in temperate or Arctic sections, indicating that a climate suitable for their growth existed in those regions at one time.

Tree fossils have been found in Antarctica, for example, and their discovery indicates that the Antarctic Continent, now in its ice age, once possessed a temperate climate in remote ages. Possibly it once supported a varied plant and animal fauna.

A recent discovery of similar significance was made in Northern Alberta, where a government engineer of the Canadian Department of Mines came upon several fossil trees. The age was estimated at between 10,000,000 and 20,000,000 years. The real importance of the discovery, however, lay in the fact that at least one of the trees is of a type which is now found in Japan, according to Dr. I. W. Hiley of Harvard University. This is considered evidence that North America and Asia were at one time joined.

One feature of the discovery in Alberta was the fact that the trees were in a state of perfect preservation. The growth rings could be counted, the leaves were in fair condition and the wood could be cut with a jack-knife. It seldom happens that plant or animal fossils are found so well preserved.

In most cases the soft parts decay very rapidly, before a protective layer of sand or clay can fall over them, while the hard parts are preserved chemically. In animals it is frequently found that the material of the bones has been replaced by silica or some other mineral.

Ferdia Balm—There is nothing like it for creating and restoring a lovely complexion. Cooling, caressing and softening, it is a perfect skin preserver or chafe caused by weather conditions. Delicately fragrant it adds exquisite charm to the most faded appearance. Dainty women inevitably use it. It is a perfect skin preserver, smooth lotion, it makes the skin rosy in texture. Recommended also to men and women who desire a truly perfect toilet requisite for every woman.

Leprosy Being Cured

Eleven Patients Recently Released From U.S. Institution

Quietly, as ships long docked sail with a strange sea, also men and women have left the government leprosy hospital at Carville, Louisiana, to face a world which some of them have not seen for two decades.

Each carried a treasure which money could not buy—a certificate attesting they have been cured of leprosy, a disease dreaded and shunned since Biblical times.

Some will take new names and make new lives—the government will not ask to questions. Their departure—brightening the hope of 320 other patients—will bring the total number to be released in the last few years to 83.

For Catarrh—It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as it can outwardly. Sufferers from catarrh will find that the Oil when used according to directions will give prompt relief. Many sufferers from this ailment have found relief in the Oil and have sent testimonials.

The Faulty Doctor

The family doctor is coming back, says a physician who has been making a national survey of the medical situation. He has been ignored lately in favor of specialists on one hand and self-selecting on the other.—Brookton, Mass., Times.

Telephone In Canada

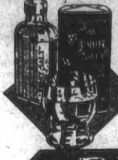

The estimated number of conversations by telephone in Canada during 1932 was 2,325,500,000, including 37,192,000 long distance calls. For every 100 of the population in that year there was an average of 15 telephone.

Four-fifths of the automobiles owned in Brazil were bought on time.

Soviet Plan a Failure

Engineers Say Five-Year Idea Had Entirely Collapsed

Philip Hartly and Mrs. Hartly, of Newark, New Jersey, who stepped down the gang-plank of the liner New York and heaved hearty sighs of relief. They were back where shoes cost less than \$10 a pair, and butter just \$10 a pound. They had come back from Russia.

Hartly, mechanical engineer, who went to Russia last August to investigate rolling mills in Siberia, had much to say, and little of it was complimentary to the Soviet of the so-called five-year plan of social and industrial reorganization.

"The five-year plan is not collapsing," Hartly remarked. "It has collapsed. The people are in rags. There is depression everywhere."

To Test Hudson Bay Route

Would Increase Initial Grain Movement To Not Less Than 5,000,000 Bushels

Asking that Federal Government, through Hon. Dr. R. J. Manion, Minister of Railways and Canals, give due consideration to the advisability of increasing the initial grain movement to not less than 5,000,000 bushels in order to adequately demonstrate the Hudson Bay route as a "valuable and necessary trade outlet for export farm products," the Saskatchewan traffic committee unanimously passed a resolution to that effect.

London school children collected 6,856 pounds of tinful, worth \$1,625, for a hospital last year.

MILBURN'S HEART NERVE PILLS

Price 50c a box

Sold at all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co. Ltd., Toronto, Ont.

Everything Would Turn Black

Mrs. Andrew Black, Harcourt, N.B., writes: "I had been troubled for some time with fainting spells and everything in front of me would turn black. I would fall down and be unconscious for several minutes. I did not know what to do, until one day I was reading where Milburn's Heart and Nerve Pills had helped so many people and I would give them a trial. I used over a dozen boxes and found they helped me wonderfully."

WHEAT EXPORTS ARE SHOWING STRONGER TONE

Ottawa, Ont.—Canada's export of wheat during the present crop year, namely, from August 1st to Jan. 31st, has exceeded the corresponding period last year by nearly 60,000,000 bushels, stated a report from the wheat situation issued by the Dominion Bureau of Statistics recently. The review of the world situation indicates a favorable outlook for a steady demand for Canadian wheat for mixing purposes.

Lower shipments of wheat during the month of January from North America and Soviet Russia were offset by larger clearances from Australia and Argentina. Increased consumption, especially that of countries ex-Europe, has surprised the authorities and Bromhall's world shipments for the crop year up to Jan. 31, are almost 70,000,000 bushels in excess of last year. Stocks of wheat in European and United Kingdom ports generally declined during January. Imports of wheat into the United Kingdom also showed a continuous decrease, but there was a revival of demand from Italy, France, Holland and Belgium.

"The demand for Canadian wheat abroad," says the report dealing with the month of January, "has held fairly steady, but there has been the usual seasonal decline, which shows signs of going even further in the present short month. Although retarded in January, competition from Russia and the southern hemisphere is now growing, and prices for Canadian wheats have registered a greater relative advance in February than prices in other markets."

"Canadian grain is held in stronger hands, and there are indications that financial and economic conditions in our three rival wheat-exporting countries are encouraging sales amounting to liquidation. However, the surplus of wheat of the southern hemisphere reaching the European market, will induce a steady demand for Canadian wheat for mixing purposes."

"Argentine wheat normally competes directly with Canadian wheat in kind and quality, while the soft Australian wheat is rather complementary. The Argentine carry-over and the new crop are damaged in weight and quality by rain and weathering, and the stronger, heavier grades of Canadian wheat will be needed for mixing. Australian wheat is also lighter in weathering, but its cheapness and type are attractive to the Orient and India. Milling regulations in the Orient and quota systems extant in Europe also encourage the use of high-quality Canadian wheat in preference to the weaker grades commonly produced in other countries."

Killed In Plane Crash

Inventor Of Mystery Craft Meets Death In Own Machine

Rosevelt Field, N.Y.—Henry Davis, inventor of a mystery "plane," took his ship into the air for the first time and was killed when it crashed. Carl Nelson, his co-pilot, was slightly injured.

The craft, a tandem monoplane with an odd, square-shaped fuselage and front and rear wings of equal length, was being flown by the automobile when it nose-dived to the earth. Davis, a man of 50 who turned up here a couple of years ago and refused to tell anyone the details of the aeroplane innovation he was tinkering with, was instantly killed. He was said to have spent \$100,000 on the ship.

Aid For Unemployed

More Than \$15,000,000 Has Been Spent In Ontario

Toronto, Ont.—More than \$15,000,000 has been spent by the province of Ontario in providing employment and relief since the Dominion Unemployment Relief Act came into force. The \$15,000,000 were given employment up to the end of January, Premier George S. Henry told the legislature in moving second reading of his Unemployment Relief bill.

At a brief sitting the House approved the bill, which authorizes the expenditure of \$4,000,000 by the province on unemployment relief and validates certain debentures floated by municipalities to meet their share of the relief programme.

Federal Radio Rights

Rights Of Dominion and Provinces To Be Referred To Supreme Court

Ottawa, Ont.—The respective rights of the Dominion and the provinces on radio broadcasting will be the subject of a reference to the Supreme Court of Canada. It was officially stated recently. Preparation of the questions to be contained in the reference is under way.

No decision has been made by the Dominion Government as to whether or not it will be represented at the hearings being initiated in the Quebec courts by the Trésorier général on radio broadcasting. It is quite possible that the Dominion will not be represented at the proceedings started by the Quebec government, but will proceed to bring its own reference before the courts.

From all indications the matter of introducing legislation at the coming session of parliament will be dependent on the date on which the proposed Dominion reference is argued before the courts and a decision has been reached. The probability, however, at the moment is that the judgment of the court may not be secured in time to bring down legislation on the date on which the proposed Dominion reference is argued.

The whole subject of radio broadcasting, involving the question of nationalization, has been under consideration since the Premier Trésorier of Quebec, though, raised the question of Dominion control within that province with the month of January, "has held fairly steady, but there has been the usual seasonal decline, which shows signs of going even further in the present short month. Although retarded in January, competition from Russia and the southern hemisphere is now growing, and prices for Canadian wheats have registered a greater relative advance in February than prices in other markets."

Grain Growing Countries

May Hold Conference

Might Be Advantageous Says Retiring Chairman Of U.S. Farm Loans Board

Ottawa, Ontario.—Representations have been made to the Dominion Government, it was stated here, that a conference be held in which Russia, Australia, Argentina and Canada would participate to discuss the wheat situation. It is understood that so far the government does not take kindly to such a conference.

Despatches from Washington quote Alexander Legge, retiring chairman of the United States Farm Loan Board, as stating a conference of wheat producing countries might be advantageous. It might disclose on Russia's part a readiness to agree to more orderly marketing that would give better prices to all producing countries.

RELIEF PAYMENTS TO PENSIONERS WILL CONTINUE

Ottawa, Ont.—Relief payments to pensioners will be continued by the Dominion Government at the same rate as heretofore. Official announcement to this effect by Premier R. B. Bennett, was received with widespread approval by pensioners affected throughout the Dominion.

"Payments already made for relief purposes to pensioners have not been interrupted by the government, and the government has not intended to interrupt them," the prime minister declared, "and, in addition, a substantial sum has been set aside for the government's warrants. The law provides that government-guaranteed warrants can only be issued in cases of urgent necessity."

"The minister of pensions and national health has been investigating the situation and, being now satisfied of the great urgency of the case, an additional warrant has been issued by the administration and relief payments to pensioners will be continued at the same rate as heretofore. There was no desire, as heretofore, to cause hardship to those who had been receiving relief."

Schedule of monthly allowances for unemployed pensioners, while Premier Bennett announced, was continued, as follows: Single men, \$20; married men with no children, \$45; married men with one child, \$57; married men with two or more children, \$67.

Maximum of pension obtainable for unemployed pensioners has been \$67 monthly. From this amount is deducted the pension the man was receiving and the difference is paid to the form of a voucher to be used in the purchase of the necessities of life.

The Sunshine City

Calgary, Alberta.—Calgary claims the undisputed title of the sunshine city of Canada, as a result of the meteorological service for January. During that month this city enjoyed 188 hours of sunshine. The nearest claim to this was St. John with a total of 131 hours. Fredericton was third with 129 hours, while a few cities, particularly in the prairie provinces and Quebec, averaged between 110 and 115 hours.

SPEED KING IS KNIGHTED

FOR REVISION OF WAR DEBTS

Many Queries Regarding Russia Come Up In British Parliament

London, England.—"Out of 1,080 questions addressed in the House since 1st October, 1922, or approximately one-third, have related to Soviet Russia," said Rt. Hon. Arthur Henderson, secretary for foreign affairs, in reply to a question from Miss Ellen Wilkinson, Labor, East Middlesex, in parliament.

The foreign secretary said he was unable to give any estimate of the cost of ascertaining the information that had been given, but the cost of issuing three official statements on Soviet legislation, religion, and labor was about \$700.

Miss Wilkinson quoted the estimate of a member of the previous Conservative government, that average cost of ascertaining a reply to an official question was \$10, and suggested the opposition might make a move in the direction of national economy in this respect.

Mr Thomas White, former finance minister of Canada, who proposed a convention of all interested nations and a renunciation or revision of all war debts.

Duty Is Remitted

Old Clothes From England For Saskatchewan Farmers Escape Duty Payment

Ottawa, Ont.—Northern Saskatchewan farmers have applied to relatives in the Old Country for old clothes. The appeal having been heard the customs officials in Canada, however, have been holding up the shipments for payment of duty of 25 per cent. In some cases the officials made the duty higher than the value of the clothing in London.

A farmer at Clondonald, north of Lloydminster, has appealed to Ottawa, claiming the farmers were penniless and too poor just now to pay even the duty on secondhand clothing. It has been ascertained that there is a clause in the Customs Act providing for the remission of duties on secondhand clothing when an affidavit is made that the recipients were not in a position to pay. Customs officials at Lloydminster, where the clothing has been held up, have been notified of the regulation and ordered to deliver the clothing on receipt of the affidavits.

Asking Amendments To Criminal Code

Several Changes Requested By Chief Constables' Association

Winnipeg, Manitoba.—Numerous changes, additions and amendments to the Criminal Code of Canada were asked when the legislative committee of the Chief Constables' Association met the minister of justice and other law enforcement officials at Ottawa.

Chief of Police Chris H. Newton, of Winnipeg, who is secretary of the association, attended.

The legislative committee urged the use of telegraphic warrants, amendments to the Vagrancy Act, and discussed deportation of undesirable and problems of handling untried gatherings.

Higher Duty On Beans

Ottawa, Ont.—Exercising power delegated to him at the last session of Parliament, Hon. E. B. Ryckman, Minister of National Revenue, has set a value of three and a half cents a pound for duty purposes on dried beans. This would not apply to import under the British preference, the departmental order specifying that it had to do only with the intermediate and general tariff.

Questions Cost Money

DISCOUNT IS SET ON U. S. AUTOS NOW IMPORTED

Ottawa, Ont.—Fixed discount of 30 per cent. from list prices has been placed for duty purposes on all United States automobiles entering Canada for sale. Announcement to this effect was made by Hon. E. B. Ryckman, Minister of National Revenue.

Motor cars coming into this country from the United States enter on a listed price, less a discount, and on the reduced value duty is assessed. This discount has ranged all the way up to 30 per cent., and for the protection of the Canadian industry and Canadian labor automobile manufacturers in this country asked that action be taken to place a maximum on the discount.

In the event of automobiles coming into Canada for sale with a discount in excess of 20 per cent., Mr. Ryckman stated, the dumping problem would apply.

Positive assurances have been received from Canadian manufacturers, Mr. Ryckman declared, that in no event will the price passed and afterwards be increased by the action taken to protect the industry and employment for Canadian workers.

The whole subject was thoroughly discussed at a meeting of cabinet council which concluded recently. An order in the form of a regulation was approved by the minister.

Request for action came from Canadian automobile manufacturers, who stated that the price passed and afterwards be increased by the action taken to protect the industry and employment for Canadian workers. AD FOR A YOUNG INDUSTRY

The immediate future of the beet sugar industry in the west depends upon the decision of the federal government as to whether it is possible to give aid to this young industry which is so important to certain districts in southern Alberta.

It will likely be known in a few weeks time if this aid will be forthcoming. Government officials have their assurance that they will give the matter every consideration, and if it seems that some of the power of the government, the farmers who raise sugar beets may reasonably expect assistance in the form of a tariff that will give the industry sufficient protection to carry on against foreign competition.

The government reaches out to a young industry in this way, but industry over the obstacles with which it is now confronted, the irrigation areas in Alberta will result in the beet sugar industry as it is established today, able to carry on, but assurance is given by the same referring interests that it will extend their operations to building more factories in other beet growing areas. The building of a factory in the Barrow-Talbot district is expected this year and two more factories are planned for 1932.

It is not announced where these three new factories will be built, but the beet sugar industry has been made familiar with the situation in the Beaver River block, and in the case of the splendid possibilities of developing the beet sugar industry in this area, it is more than likely that one of the factories will be built in this district.

Government assistance to young industries is nothing new. It has been given before in a number of instances with beneficial results. In view of the benefits which the irrigation areas would derive, it would seem that government aid to the beet sugar industry would be justified.

SPRING TALKING ON

THE WINTER
Another month has passed, and still we have no winter—winter as we have learned to know it in southern Alberta.

Day after day of bright sunshine and balmy breezes is still the cause of much wonderment, but after three months of it we are now coming to expect a continuance of this kind of weather.

Speculation is rife as to the cause of the fine weather, its probable continuance, and the prospects for rain in this coming summer. And while no change or improvement may be expected from all our discussion of the weather, nevertheless the weather is of paramount importance to an agricultural province whose fortune may depend upon a few inches of rainfall coming at the right time of the year. Therefore, we talk about the weather.

The great question is, "Will it rain next spring and summer?" We should say, and our guess is as good as anybody's, yes, we can expect it in. The past two years this district has received less than the average rainfall. To bring the amount up to average, we may expect considerably more rain this year than in 1929 or 1930. On the other hand a third dry season may occur, or possibly the climate is changing and in the future years there will be less rainfall than the past average.

At any rate, is only one thing to do concerning the 1931 crop, and that is to proceed as usual with the planting of the seed and trust Mother Nature to supply the needed moisture for growing a good crop.

Borrowers

I like to give freely,
But don't like to lend;
I get my things back,
I often must send.
As for my umbrella,
They go rain or shine;
Conveniently borrowed,
They're no longer mine.
Books, pencils and pens,
The disappear too;
Of original possession,
I now have but few.
In matters of money,
I give men, sad to say,
Pledges to borrow.
Are slow to repay.
I like to give freely,
But don't like to lend;
I pray that my neighbors,
Their habits will mend.
Lend me
I had my money and my friend,
I loaned my money to my friend,
I asked my money of my friend,
I lost my money—and my friend.
—Greenville Kleiser.

GRANT FLEMING, M.D., — ASSOCIATE SECRETARY

BLOOD PRESSURE
The blood in our bodies is constantly in circulation. The heart, which fills with blood between beats, thrusts out this blood each time it contracts, thus causing it to circulate. This thrust, or impulse, given by the heart, is carried right, along the blood stream in the arteries, and can be felt at various points in the body, notably at the wrist, where it is called the pulse.

The degree of blood pressure varies in different people. Indeed, it varies in the same person, from hour to hour, depending upon a number of factors, such as activity and rest. Variations in the blood pressure, within certain limits, are normal. Outside of such limits, if the blood pressure is persistently above or below the normal, this is a symptom which suggests some disturbance of the functions of the body or the existence of some diseased condition.

Frequently someone states that he is suffering from high blood pressure, such an individual being evidently under the impression that high blood pressure is a definite disease; it is only one symptom which may indicate disease. In the way that sugar or albumin in the urine is a sign of disease, if the blood pressure is a symptom of some abnormal condition.

About the worst thing that can happen to someone whose blood pressure is wrong is for him to be the type of person who thinks on talks of nothing else. This is bad for himself and it is hard for his friends. It is not suggested that an abnormal blood pressure be ignored, but once advice has been received from the doctor as to treatment and as how to live, it would be ever so much better for the patient to follow that advice and stop fussing. We say this, because worry and fussing only make the condition worse. Worry itself is a common cause of increased pressure.

An increased blood pressure may

Why Worry?
How often in the evening, after working hard all day, I've sat and worried by the hour to pass the time away.
I've watched the bills parade across the play-ground of my mind;
I've counted how to pay them; but I've always been too busy to do so.
I've known that half my appals would fall, or else would never pay;
I've felt that all my prospects would be to die of debt.
But, looking back upon such scenes, I note—without regret—
The things I worried most about have never happened yet.

Now if it's true I can't foretell my troubles and my ills,
It's simply waste of time to make whole mountains out of hills.
If I can't figure out what life is holding in its net,
I ought to laugh at life and plan what I will do to it.
I ought to sit and gaily think of new ways to succeed,
And never once to fear or care give countenance or heed.
But how to cease this glooming, and no longer fuss or fret,
Yes, how to stop all worry—that's what makes me worry yet!

Putting it Politely
"I've got a pretty distasteful job before me," remarked the genealogist. "Mrs. Newrich employed me to look up her family-tree, and I've got to inform her that one of her relatives was electrocuted."
"Why worry about that?" said his friend. "Just write and let the man in question occupied the chair of applied electricity at one of our public institutions."

be due to one of many causes. If the heart loses some of its power to contract, the pressure in the blood stream is affected. Other reasons for an abnormal blood pressure are loss of the elasticity which healthy arteries have, or kidney trouble, or the occurrence of some acute or chronic disease. It is easy to see, therefore that there are many conditions which are real, underlying cause of alterations in the blood pressure.

The gravity, or otherwise of an increased blood pressure depends, first of all, upon what is causing the trouble, and then as to whether or not the cause can be removed or corrected by proper treatment.

In addition to the treatment directed toward the removal of the cause, it is usually necessary that a new or altered mode of living be followed, at least for a time. This does not mean that the person becomes an invalid; indeed far from it, because exercise or work which does not fatigue is actually helpful in most cases. But it is necessary attention be given to diet, rest, fresh air, and such other apparently simple but important matters. The individual who is overworked must reduce. Alcohol must be given up.

Just what treatment is needed varies from case to case, as no two are exactly alike, and that is why each needs advice, aid, supervision on the part of the family doctor so that each may be told how to live in accordance with the particular requirements of his case.

Questions concerning health addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

Duchess News

DUCHESS, Feb. 26.—Miss Hazel Simmons went to Medicine Hat on Tuesday.

Mrs. Fred Palmer returned from Bassano on Sunday. Her daughter Daryl is doing fine in the hospital there where she underwent an operation for a mastoid.

Mrs. McDonald and Mrs. Worley and the Misses Woodward and Hutton motored down from Calgary and spent Sunday at the Woodward home.

Mrs. Woodward was called to Stockholm, Sask. Sunday on account of the serious illness of her father. Mr. and Mrs. T. Horn returned Monday from a three weeks holiday spent in Edmonton.

Mrs. Kollar and daughter folk, Mr. and Mrs. Bradley and son Ernie, of Medicine Hat, spent the week end with the Koss, and Lightfoot families. They were accompanied, back to Medicine Hat by Mr. and Mrs. Carol Kollar who will spend a week there.

The March Club is putting on a concert on March 5 which promises to be an exceptionally good one. There will be vocal solos, piano, quartette, piano and violin, monologue and recitations, also songs by intermediate and junior boys. Admission 35 cents, school children 15 cents.

His Lucky Night
"I called on Mabel last night, and I wasn't any more than inside the door before her mother asked me my intentions."
"That must have been embarrassing."
"Yes, but that's not the worst of it. Mabel called from upstairs and said, 'That isn't the one, mother.'"

Makepeace News

MAKEPEACE Feb. 24—Everyone seems to have forgotten that it is hard times and they are going around in the snow. This is due to the spring like weather. The farmers are busy cleaning grain and getting their machinery ready for the spring rush. W. S. Weir reports that he has a little white Leghorn chick that has come out to see what he is all about, and Alex Carlson informs us the wigwags are hatching in his barn. Gophers are seen almost every day, so spring must be here.

Lester Long and Miss Lillian Jarvis of Cluny gave the people of this vicinity a surprise by announcing that they had been married for about two months. So in return their many friends and neighbors gathered at their home and charivari the happy couple last Saturday. The wedding was spent playing games and dancing.

Mr. and Mrs. W. B. Weir attended the Masonic dance in Bassano last Friday.

Mr. and Mrs. A. A. Botsch were calling Mr. Bassano on Friday last. Mrs. J. Jamieson of Carleton spent a few days last week visiting friends here.

A number of the young people gathered at the home of Veri Campbell last Saturday. A very enjoyable evening was spent playing games and dancing.

The Brooks returned north of Bassano last Sunday to play a game of hockey with the Red-Busters. It is reported the game was a very good one the score being 6-4.

Mr. and Mrs. A. Mortison were business callers in Bassano last Friday.

Mr. and Mrs. Chas. Rodbourne returned Sunday after visiting a few weeks in Calgary visiting with Mrs. Wm. Malin and family.

The local boys gathered at the home of Mabel Robertson last Sunday and enjoyed a chicken supper that was cooked in bachelor style.

Mr. and Mrs. Harry Herford of Bassano spent a few days last week visiting Mr. and Mrs. W. S. Weir.

A few of the friends of Mr. and Mrs. C. C. Jorgensen gathered at their home last Friday and spent a very pleasant evening playing games. Geo. Nelson and Erna Knudsen spent Wednesday last visiting Mr. and Mrs. Lars Jensen.

Howard Larson was a caller in Bassano Friday evening.

Ed Martin and Gordon Jones called at the home of K. Pedigo last Saturday.

Mr. and Mrs. N. E. Ray were business callers in Bassano last Tuesday.

Mr. and Mrs. Roussau and family of Cluny spent Friday visiting with Mrs. Clark and Johnny.

Tom Mullen was a business caller in Bassano last Tuesday.

Mr. and Mrs. F. J. Palmer and Samuel and Mr. and Mrs. F. L. Walker were visitors at the home of Mr. and Mrs. E. A. Brooks on Sunday last.

Cheerio Makepeace. Here is something to look forward to. The W. L. of Bassano are putting on a Hard Times whist drive and dance in the Community Hall on Friday, Feb. 27. Mrs. Hefelbower of Makepeace is a member of the W. L. and would be pleased to see the people of this community take the opportunity of getting away from the monotony of a hard time winter at home. Buy out and have a jolly evening. The dance of the season. Tickets only 50 cents.

5,000 FACTS ABOUT CANADA

"The Dominion is a Nuisance!" is the arresting sub-title of the widely known annual, "5,000 Facts About Canada," compiled by Frank Velch, the recognized authority on the subject through his writings and lectures. This 88-page booklet, now in its 25th year, has become indispensable in thousands of Canadian homes while it is in increasing demand from other countries desiring to learn of Canadian conditions.

5 chapters, running alphabetically from "Agriculture" to the "West" and "Yukon," tell the story of the country's progress in a series of brief crisp sentences easy to locate and assimilate—a story that is both cheering and stimulating. It is extensively used by governments, corporations, colleges and schools, and also as a means of "selling Canada" to people in other lands. It is therefore a most valuable advertisement of the Dominion. Most news dealers carry it, or it may be had, at a copy, from the Canadian Facts Pub. Co., 558 Huron St., Toronto 6.

BASSANO

Local News

Friends in Bassano will be interested to learn that a son was born to Mr. and Mrs. Douglas Frew, of the Banff Springs Hotel, on Feb. 20.

Several motor cars loaded with hockey fans took in the Calgary-Gleichen game at Gleichen Tuesday evening.

R. P. Currie returned to Bassano Friday from a business trip to Chicago and Ottawa.

Mrs. H. Ford returned home from Lethbridge this week. She visited Mr. and Mrs. Earl Beck in the school city.

Jimmy Pierson was in Calgary last Saturday.
Mr. and Mrs. P. J. Beck were over from Lethbridge on Tuesday visiting friends in Bassano.

Joe Harris is now using a Ford truck for hauling oil and gas.

H. Ford was in Calgary on business for a few days this week.

Of course you are coming to the Lord's time, whist drive and dance in the Masonic Community Hall on Friday evening of this week. You don't have to worry about what to wear for this social evening. It is a hard times affair; the W. L. will be business that night, and you can rest assured everything will be right. So put on your rag and join in the fun, there's a good time in store for everyone.

The Ladies Altar Society of the R. C. Church is making preparations for the annual St. Patrick's whist drive and dance on Tuesday, March 17.

The warm weather has made skating and curling impossible, so the equipment at the rink has been discarded, and the premises locked up.

Another social evening is being planned for Bassano people on Easter Monday, April 6. The Anglican vestry will be hosts that night of a whist drive and dance.

Rev. Father Newman, of Midland, and Father Douglas, of Strathmore, were in Bassano on Wednesday last.

BIRTHS

The following births are recorded at the Bassano Hospital:
A daughter, to Mr. and Mrs. N. M. Sandahl, of Gen. on Friday, Feb. 20.
A daughter, to Mr. and Mrs. G. C. Tompkins, of Hussar, on Friday, Feb. 20.

A daughter, to Mr. and Mrs. Geo. Gaudin, on Sunday, Feb. 22.

RECORD ATTENDANCE AT WINNIPEG SHOW

There is apparently no lack of interest in the developments of the automobile industry at Winnipeg. At the General Motors Show held in the western city recently, more than 54,000 people viewed the new car models. This is almost twice the number who attended the National Automobile Show of Eastern Canada at Montreal in January and nearly a wide margin the attendance record at the Ottawa and Windsor shows. The Montreal show had an attendance of 27,000 people; Ottawa, 24,500 and Windsor, 25,000. An encouraging fact in connection with these attendance records was the number of sales of new cars made at the exhibitions.

PLAN OVERCOMES DANGER FROM HEADLIGHT GLARE

To minimize the danger of headlight glare, which is one of the greatest menaces in night driving on the highways, a plan has been suggested by George McNamee, Secretary of the Royal Automobile Club of Canada. He draws attention to a town in Massachusetts where the problem has been solved to some extent by painting white lines along the sides of the roads for some distance leading from the town. The stripes were placed at either edge of the highway and when two cars meet the drivers merely pull over to their sides until their right wheels were on or along the lines and knew then that they were safe from going off the road even if they were blinded by the glare of the approaching car's lights. It was easy to distinguish the white lines in spite of the glare and it served also as an assurance that the road was in good condition and that no soft left shoulders, curbs or culverts were to be feared.

ROUND THE WORLD BY MOTOR CAR

Fresh from a world tour of more than 100,000 miles, packed with romance and adventure and tinged with tragedy, George Jelinski, native of Poland is now in the United States after a globe-circling trip made in the interests of the Polish Boy Scouts. Mr. Jelinski visited the Buick factories at Flint, Mich. last week, to have his car examined after the long journey and chatted with officials of the company concerning the adventures of his trip. One of his companions on the tour was stricken and died and the other fell ill and returned home, leaving him to finish the greater part of the venture alone. The Buick in which Jelinski made the trip bears the insignia of 30 automobile clubs he joined in Poland, France, England and other countries. The car is equipped with radio, and the rear seat is so constructed that it is easily converted into a bed.

"DOC" SMITH RETRACES NEW TRAIL

Having completed one trip from the Pas to Winnipeg as the first attempt to ever cross over the deserted stretch of bush and marsh country that separates the two places Dr. William Smith will soon retrace the trail he blazed several weeks ago. "Doc" Smith, as he is familiarly known at The Pas, drove a brand new Chevrolet through the deep snow and over frozen muskeg and like just to prove that it could be done for one thing—and to show the need of a highway for another. After being teased by the Mayor and other civic officials at Winnipeg, "Doc" Smith continued his journey to Montreal. He stopped off at General Motors factories to have his car checked over and \$5 covered the bill for repairs. Now he is returning to his home and will soon push on into the bush country again, taking with him only two axes and a shovel as his equipment to overcome the obstacles that will beset his path.

SPARKS AND FLASHES FROM THE ANVIL OF PARLIAMENT

(continued from page 1)
would solve all the province's financial problems.

"If we so desire we have the opportunity, through our unlimited resources, of finding a complete answer to financial problems. By selling a portion of our land acres, at even \$1, an acre, we can build up a striking fund such as is possible in no other provinces in the dominion." These are the words of the premier. Mr. Brown pictured Alberta as the envy of the other eight provinces in its ability through the sale of lands to get out of all its difficulties of the ministerial view of the effect of the new measure, Alberta is to become a "land flowing with milk and honey" through the sale and limited settlement of its vacant lands.

The opposition of the Liberals to the lands measure was not so much to the bill itself, as to some of the principles involved in its details. Chiefest among them being the provision that none but residents within the boundaries of Alberta for five years can take up homestead lands. The Liberals take the stand that to set such a regulation on homestead was to legislate against Canadians as such. It means to

shut out from the province all settlement from the other eight provinces through homesteading. If the intention of the government was to close the homestead lands against foreign settlers, there would not be the same objection, but to close these lands and opportunities against Canadians who have not lived in Alberta five years the opposition considers to be an act of narrow provincialism and selfish discrimination. The Liberal resolution declared "that any person born in Canada, or any bona fide resident of Canada, and any member of the family of said person having attained the age of 17 years, shall be entitled to obtain entry for homestead."

H. J. Montgomery of Wetaskiwin, declared there was too much left to the government to deal with regulation rather than by legislative provision in the bill. The principle of the bill, however, has been accepted by the house and while its final shape is not complete until it has emerged from committee at some time following the budget debate, it will likely reach the stage in some or less its present form. Just now, however, the spot light of interest is turned on the fiscal policies of the government, and the week now begun will provide the battle ground for much firing at the government over the details of the budget.

Countess

COUNTRESS, Feb. 25—Mrs. J. Snape is away for a holiday with her parents near Red Deer. The dance and card party Friday evening of last week was quite a success. There is talk of another; watch for the date.

Mr. and Mrs. Geo. Goudie are the proud parents of a baby girl, born at Bassano Hospital on Sunday, Feb. 22.

Maurine Ferguson has been ill with the flu.

Mr. and Mrs. R. Robson, Mr. and Mrs. B. Pollock, and Mr. and Mrs. Miller, of Gem, were among the guests for dinner at the home of Mr. and Mrs. Dale Ferguson on Sunday.

Mr. Violet, of Gem, preached a short sermon on Sunday at the C. C. Club house.

A number have been complaining of colds and flu.

Mr. and Mrs. M. H. Gamble and children spent Sunday at Gem visiting.

Mr. Sorenson has been quite ill the past week with flu.

At a C. C. Club meeting Monday evening it was decided to line the hall walls with beaverboard.

H. Cowan says he has not missed a day working in the field since January 27.

Chas. Hordell and Sam Henderson were visitors at the Matlock home last week.

All Explained
When Venus yanked Adonis tried to string him as her beau—
He gabbed his hat and left her flat
stunning he would go.
A wild, wild bear here down on him, and with his dying breath
This clever youth cried, "Ye, forsooth, I'm simply bored to death!"

KNOX PRESBYTERIAN CHURCH
The Church Where Everybody Feels at Home
Rev. P. C. McCar, minister
Sunday, March 1st, 1931
11 a.m.—Sunday School.
7:30 p.m.—Evening Worship: subject, "The New Commandment."
A devotional sermon from the heart of the Gospel.
Everybody Welcome

Pool Refutes Gambrell Charges

The Alberta Wheat Pool has just issued a pamphlet entitled "A Defense of Canada's Wheat Pool." It is a reply to the pamphlet recently circulated by the grain trade in which the wheat pool was condemned by Mr. Gambrell, of London.

The wheat pool pamphlet refutes the statements made by Gambrell, and presents the case for the pool with a formidable array of figures and arguments.

The hotel-clerk was astonished to see a guest parading through the lobby in a pair of pajamas.

"Here what are you doing?" "The guest snapt out of it and apologized."

"Here pardon, I'm a nonsensical old fellow."

"Well," sneered the clerk, "you can't walk around here like that, no matter what your religion is."

CURLING AT HUSSAR

HUSSAR—Curling was resumed on Wednesday, with two games for the ladies and three for the men, according to the regular schedule. The ice was in good shape in spite of the recent thaw. The freezing Tuesday night made the surface quite smooth. If the ice holds the curling match will soon be played and the mixed rinks will begin their knockout contest.

Ralph Armstrong, of Calgary, underwent a serious operation on Wednesday. Reports late Wednesday evening were to the effect that he was expected along as well as could be hoped.

Smart Kid

A young playwright was complaining to Max Reinhardt that his three-year-old son had torn up the manuscript of his newest masterpiece.

"Ah," nuzzed the great producer, "the child can read."

Wedding

MEACHAM-BANTA

A quiet wedding was solemnized at the manse, Bassano, when Rev. P. C. McCrae united in marriage Miss Florence Jean Banta, of Durbes, and Mr. Fenwick George Meacham, of Parkland. The ceremony was performed Wednesday afternoon, Feb. 25. The young couple will reside at Parkland.

His Posing Text

A clergyman who was leaving one parish for another, and was taking with him the younger of his two carates, is said to have taken the text of his farewell sermon from a well known passage in the Book of Genesis:

"Abide ye here with the ass, and I and the lad will go yonder and worship."
